November 2020 | *Glass Handling Equipment*

Product Description

The GMS PGVL200 is a portable lifting device to assist in the unloading, transportation and installation of large sheets of glass with a maximum weight of 200kg.

The versatile device requires no power for operation and is ideal for use on construction sites and in workshops. It is equipped with two pump-activated vacuum suction cups which can be mechanically rotated, tilted and moved vertically.

Key Features & Benefits

- Robust 300mm diameter suction cups for securing large sheets of glass
- High level of safety due to vacuum leakage indicators on both suction cups
- 90° horizontal rotation of suction cups for easy movement through doorways
- Large pneumatic wheels for transporting glass sheets over uneven surfaces
- Height-adjustable handle with two rubber grips for comfortable operation
- Detachable parts for easy disassembly of the device for transportation

300mm diameter pump-activated vacuum suction cup

Technical Data

Weight (mass)	65kg
Max. glass dimensions	1800mm x 2500mm
Max. lifting capacity	200kg
No. of suction cups	2
Movements	Manual rotation and tilting
Vertical rotation	360°
Horizontal rotation	90°
Tilting	70 - 110°
